OVERGAARD & DYRMAN

Crafted in Denmark

With a strong passion for traditional craftsmanship and refined details, Overgaard & Dyrman is a contemporary furniture maker based in Denmark. Merging traditional craft techniques with modern technology, Overgaard & Dyrman's approach to design bridges the past with the present.

"We celebrate traditional craftsmanship and embrace modern technology by bringing the two together in our way of designing and manufacturing. We love products with a handcrafted finish. Merging this with the use of modern machinery gives us the opportunity to preserve the extraordinary craft skills that are still among us, and to combine them with complicated forms and manufacturing techniques."

THE STORY

Overgaard & Dyrman (O&D) was founded in 2013 by Jasper Overgaard and Christian Dyrman. Two craftsmen, with design and engineering backgrounds, sharing a passion for extraordinary crafts and uncompromising design.

Several years prior to the foundation of Overgaard & Dyrman, the two had been collaborating on an idea of a furniture piece inspired by traditional saddle making and metal work. This idea later became the Wire Collection.

While Christian was already a skilled metal worker Jasper submerged himself into the art of saddle making, learning from the masters of this classic profession.

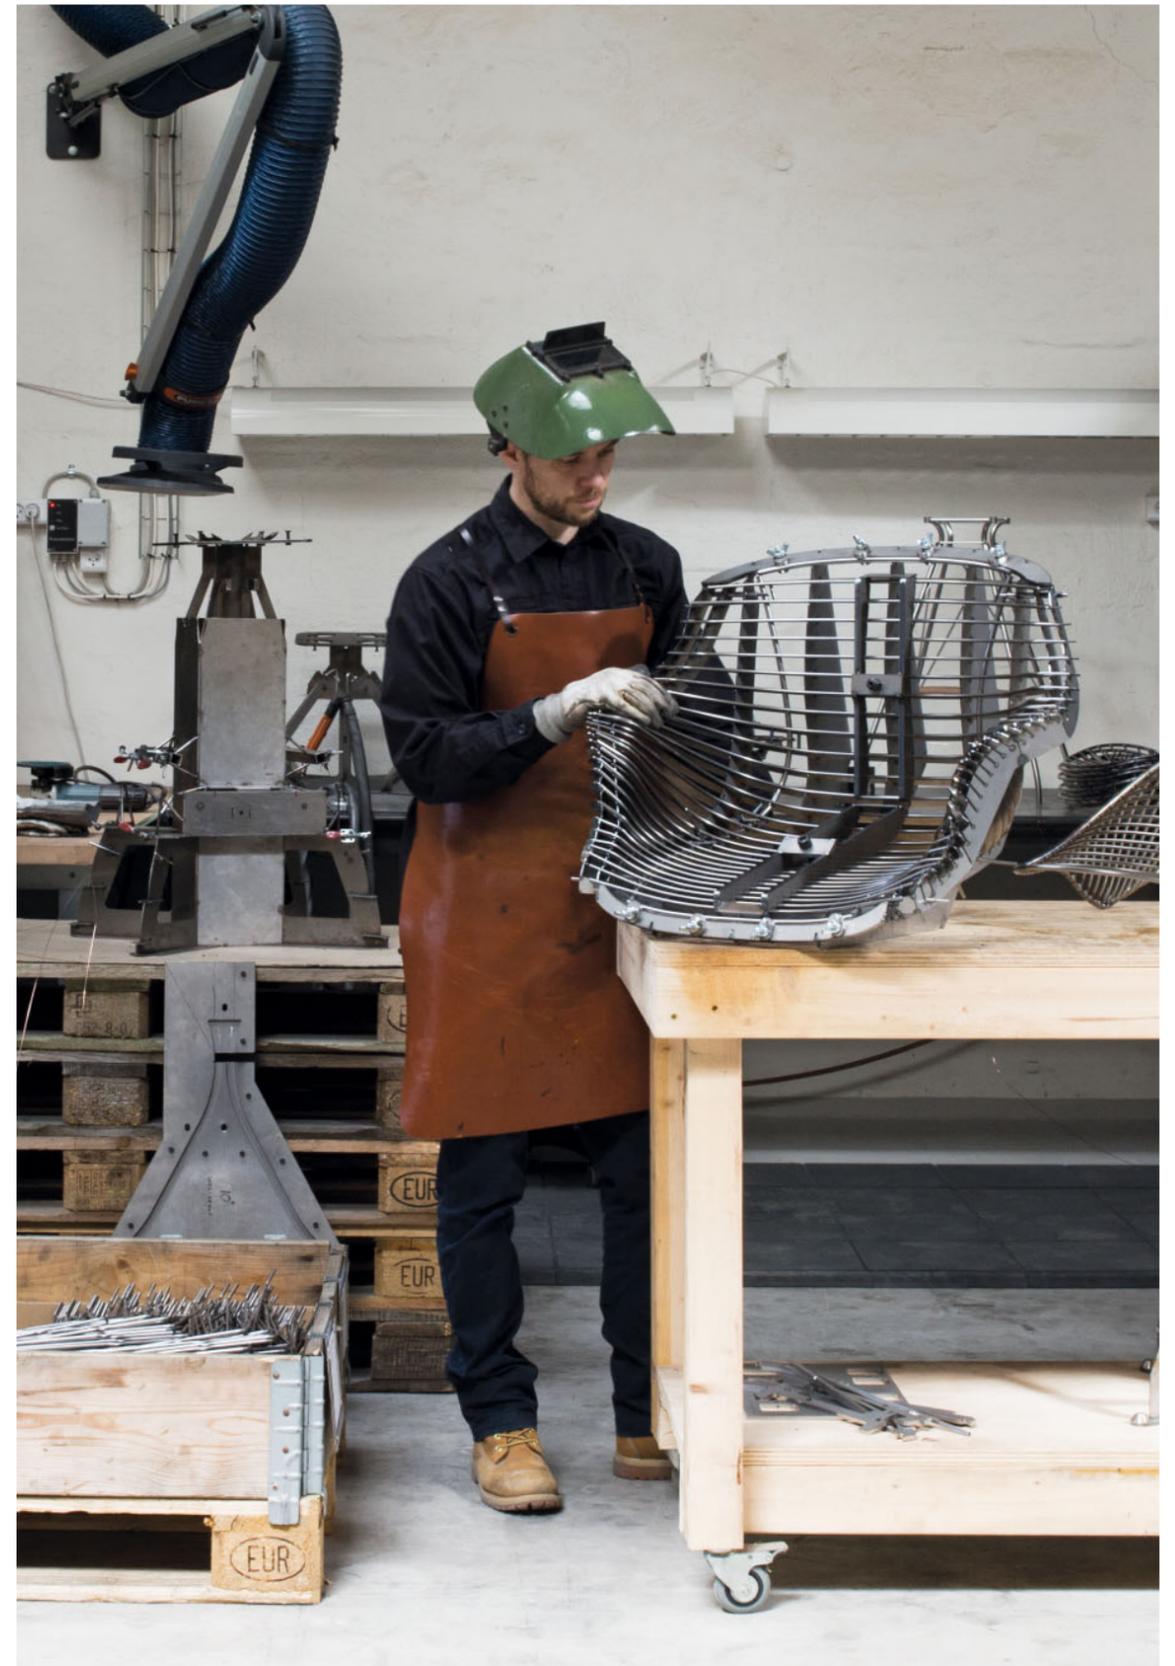

In the early days all furniture were made exclusively by the two founders, putting their signature on every single item.

Today all Overgaard & Dyrman pieces are made in the O&D workshop in Denmark by a team of highly skilled and dedicated craftsmen to ensure remarkable quality throughout the production.

At Overgaard & Dyrman we are dedicated to producing extraordinary products. Superior craftsmanship, a love for premium materials and a fascination with substantial design lie at the core of who we are and define what we make.

The secret lies within the tools

*A beautiful design holds no value unless you are able to build it.
The significant characteristics of the pieces executed at Overgaard & Dyrman are
based on the unique and custom made tools, jigs and fixtures, developed
by Christian Dyrman / O&D.*

Introducing
TWO TONE

*A luxurious colour combination with Matstone Sand and a back
in black full-grain leather has seen the light of day.*

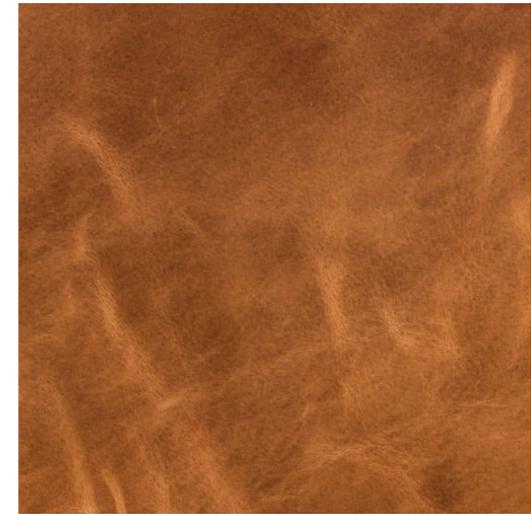

The right choice of leather

*At Overgaard & Dyrman we use only the best leathers available.
Different leathers have different attributes and are made to
accommodate various needs and desires.*

YELLOWSTONE

Aniline leather

Yellowstone Whiskey

Type:

Yellowstone is an aniline leather. It has incomparable depth and a magnificent, naturally-worn look due to a pull-up effect.

Tannage and Dye:

Tanned with chrome followed by a vegetable tanning process to enhance the firmness (Cr6+ free process). Water-based Aniline dye.

Origin:

The finest European raw cowhide from cattle grazed on the Alpine meadows spanning Switzerland, Germany, Austria, Liechtenstein and Italy.

Attributes:

Robust with visible natural markings and a slightly worn look.

NOTE: Yellowstone is a natural leather that boasts textures and markings (insect bites, scars, etc.) that are reminiscent of its natural origins. These details are to be expected and contribute to the distinctive beauty of Yellowstone, making each piece completely unique. The colours and presence of markings will vary with each individual hide.

Colour range:

Whiskey

Dark Brown

MATSTONE

Aniline leather

Matstone British Racing Green

Type:

Matstone is an aniline leather with subtle, natural markings which bring a unique personality to each hide. A process involving sanding, buffing and application of leather oil to the surface gives it an almost velvety touch. The colours will vary with each individual hide so small variations from hide to hide are to be expected.

Tannage and Dye:

Synthetic, chrome-free tanning process. Water-based Aniline dye.

Origin:

European rawhide, typically from Italy, Germany, Austria, Switzerland and Scandinavia.

Attributes:

Matstone boasts a matte raw look with a touch of understated elegance and softness.

ELEGANCE

Aniline leather

Elegance Whiskey

Type:

Elegance is an aniline leather. It is at the top of the range of deluxe, high-end leathers.

Tannage and Dye:

Tanned with chrome followed by a vegetable tanning process to enhance the firmness (Cr6+ free process). Water-based aniline dye.

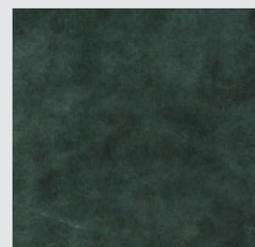

Origin:

The finest European raw cowhide from cattle grazed on the Alpine meadows spanning Switzerland, Germany, Austria, Liechtenstein and Italy.

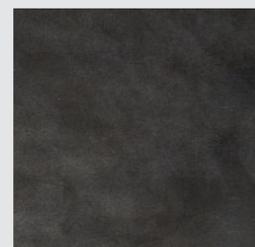

Attributes:

The ultimate in classic elegance. Boasting a natural patina that appears over time depending on the light, conditions and usage.

Colour range:

British Racing Green

Dark Grey*

Sand*

**Note: The colours 'Dark Grey' and 'Sand' are only available in the Two Tone (Black / Dark Grey, Black / Sand) combination.*

Colour range:

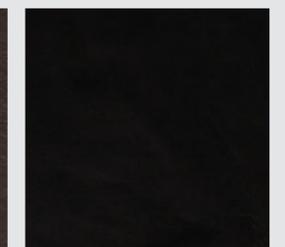

Whiskey

Burgundy

Dark Brown

Black

HORIZON

Protected leather

Horizon Whiskey

Type:

Horizon is a leather with a special surface treatment that protects it from stains and fading. It is developed to have the look of aniline leather with discrete natural markings.

Tannage and Dye:

Tanned with chrome (Cr6+ free process). Water-based Aniline dye.

Origin:

European rawhide, typically from Italy, Germany, Austria Switzerland and Scandinavia.

Attributes:

Very exclusive yet earthy appeal. Strong yet supple. It is excellent in terms of durability and easy upkeep, as it is also water repellent, dirt repellent and stain resistant. Smooth surface with a subtle shine. Discrete depth and delicious nuances of natural markings with a light surface protection finish.

Colour range:

Whiskey

Cognac Red

Dark Brown

Black

STEEL

Matte black powder coated steel

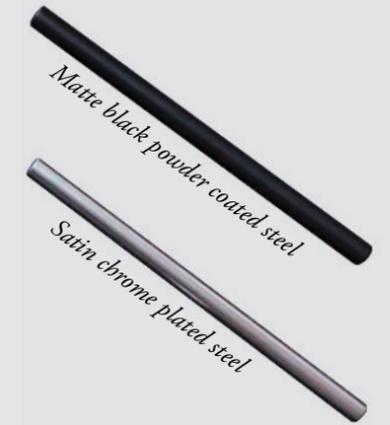

The powder coating (a thermoset polymer) is applied electrostatically as a powder.

Powder coating is more durable than conventional paint and creates a smooth, uniform surface with a matte finish.

Satin chrome plated steel

The satin chrome plating used for the Wire Collection is a hexavalent chromium (Cr6+) free process.

It is very durable surface treatment. The surface has a matte appearance like aluminum or stainless steel.

Matte black powder coated steel

Satin chrome plated steel

WOOD

Wire Bar Stool footrest

The Wire Bar Stool is available with a selection of six types of solid wood - oak, smoked oak, blackened wood, walnut, mahogany and teak. All with an oiled finish.

Wire Coffee Table top

The Wire Coffee Table is available with a selection of two types of solid wood - oak and walnut. Both with an oiled finish.

Oak

Smoked Oak

Blackened Wood

Walnut

Mahogany

Teak
